Equipment Type Management

Main Menu -> Files -> Equipment Types

This is a simple list of different equipment types you use in your jobs, and to identify the types of your own [Equipment](#). Simply enter new types on the last blank line and use the delete button on the left of each line to delete an existing type. Existing types maybe changed, and that is fine to fix spelling, but it is recommended you delete a type and re-add if it needs to be changed to something different.

Equipment Types

	Abbr.	Description	Default
	End	End Dump	☒
	Belly	Belly Dump	☐
	Side	Side Dump	☐
	Tri	Tri-Axle	☐
	Quad	Quad-Axle	☐
	Other	Other Type	☐

Abbr. - Short abbreviation for use in reports and screen displays where the entire description is not necessary.

Description - Full description of the equipment type.

Default (Optional) - When entering a job line in [Job Entry](#), the type marked default will automatically be entered for that job line equipment type.
